ACCUSPLIT® AX605SBL
OPERATING INSTRUCTIONS

Twin Button Feature: The Left and Right buttons on new ACCUSPLIT stopwatches operate interchangeably, so both are labeled **"A"** for these instructions.

Event
A–Start
A–Stop ("Time Out")
A–Restart ("Time In")
A–Stop
C–Reset

Backlight
LED Backlight comes on for 10 minutes after each button push (light cannot be turned off).

RECHARGING
To recharge the stopwatch battery, use SBLCHARGER kit (included with each watch). SBLCHARGER includes provision for charging watch from normal 120 Volt electrical outlet, from cigarette lighter in car, or from USB port on a computer.

With continuous use of the backlight, the watch will last at least 10 hours before needing a recharge. If the backlight is never used, a single charge will last approximately six months (up to one year if stopwatch is used sparingly).

SERVICE
If service is needed, please return the watch to ACCUSPLIT. Please do not open the case, as the watch is not designed for service by the consumer.

WARNING — This watch uses a rechargeable battery — replacement of the battery with a non-rechargeable battery is unsafe and will result in damage to the watch, and could cause personal injury.

NO-PROOF-OF-PURCHASE LIMITED WARRANTY
